

# On-Board Diagnostic (OBD) Diagnostic Link Connector (DLC) Charts

## Introduction

The Diagnostic Link Connector (DLC) Chart was developed from vehicle manufacturer responses to EPA's request for information under the Clean Air Act (CAA) Section 208. Although we included a suggested format for the information response, not all of the vehicle manufacturers followed this format and, therefore, some information is based on best estimates. If you find errors in this document, please notify the contact listed on the EPA website.

## How to Decipher the Charts

Manufacturer	Model Year					Comments/ Description
	Connector Location and Access (0=open, 1= covered)					
<b>XYZ Inc.</b>	<b>1996</b>	<b>1997</b>	<b>1998</b>	<b>1999</b>	<b>2000</b>	
Model X	7-0	7-0	-	-	7-0	passenger side, center console
Model Y	*6/7-1	*6/7-1	*6/7-1	*6/7-1	7-1	center console (vertical), *on vehicle centerline (96-99)
Model Z	*6/7-1	*6/7-1	*6/7-1	*6/7-1	7-1	center console (vertical), *on vehicle centerline (96-99)

Manufacturer and Individual Model Names

Individual columns for each model year 1996 - 2000

Comments column provides more detail about numbered locations

Shaded cells indicate difficult to locate or access connectors (refer to alternate sources for more information on hard to locate/access connectors)

If multiple locations are used for a particular model, the asterisked "\*" location corresponds to the details in the comments column.

Two digit code for each model and each model year:  
 - 1st digit: location in vehicle (see DLC diagram)  
 - 2nd digit: access (i.e., is it covered?);  
   0 = not covered/open, 1 = covered  
 \*(Refer to the DLC Diagram for clarification on "covered")

## Multiple Brand Names

Some manufacturers produce/market multiple brand names of similar vehicles. In this case, all of the brands have been consolidated and listed together rather than individually. They are:

- Chrysler: Chrysler, Dodge, Eagle, Plymouth, Jeep
- Ford: Ford, Lincoln and Mercury:
- General Motors: Buick, Cadillac, Chevy, GMC, Geo, Oldsmobile, Pontiac, Saturn.

# Diagnostic Link Connector (DLC) Diagram

## Explanation of Diagram Numbered Locations

Location #	Description
1	Driver's side, underneath dashboard, in the area under the steering column, +/- 150 mm (i.e., +/- 6 inches on either side of the steering column)
2	Driver's side, underneath dashboard, between the driver-side door and steering column area
3	Driver's side, underneath dashboard, between the steering column area and the center console (also includes connectors on the driver side but connected to the center console)
4	Driver's side, dashboard instrument/gauge area, between the steering column and center console
5	Driver's side, dashboard instrument/gauge area, between the driver-side door and steering column
6	Center console, vertical surface (i.e., near radio and climate controls), left of vehicle centerline
6/7	Center console, vertical surface (i.e., near radio and climate controls), on vehicle centerline
7	Center console, vertical surface right of vehicle centerline or on passenger side of center console
8	Center console, horizontal surface (i.e., armrest, handbrake area), in front passenger area
9	Any location other than locations # 1-8 (i.e., rear passenger area, passenger side glove box, top of dashboard near windshield)

**\*Note:**

- Locations #1-3 represent preferable locations, Locations #4-8 represent allowable locations under SAE J1962
- Connectors in location # 6, #6/7, and #7 may be covered by ashtrays, covers, cup holders, coin holders, etc.

# Diagnostic Link Connector (DLC) Diagram

## Cover Types

Some manufacturers use covers to protect the integrity of the connector pins and/or to prevent impact with vehicle passengers in an accident. The following diagrams provide an example of some of the covers that manufacturers have used. This does not include ashtrays, coin holders, cup holders, the dashboard itself, or other similar items used to conceal the connector.

### Protective Cover

- small, soft-plastic cover used to enclose DLC pins; may or may not have embossed "OBD" or "OBD II"

ex.

### Flip Cover

- small, hinged hard-plastic cover; typically has an indentation or tab to help 'flip' it open

ex.

### Fuse Panel or Panel Cover

- Large, hard-plastic cover that is color keyed to the dashboard; may or may not have embossed "OBD" or OBD II, or a label

ex.

## OBD Connector Locations for Model Year 1996 - 2000 Vehicles

Manufacturer	Model Year Connector Location and Access (0=open, 1= covered)	Comments/ Description
--------------	--	--------------------------

<b>Acura</b>	1996	1997	1998	1999	2000
