

# Georgia Analyzer System Message

Georgia's Clean Air Force (GCAF)

February 18, 2009

Message: 39946 Analyzers: 991

## Calibration Gases

Stations should check calibration gas bottles for proper labeling and expiration dates when these bottles are received. Calibration gases without BAR certification labels or gas bottles that have expired dates are not acceptable for use in the I/M Program. Stations should refuse or return gas bottles that do not meet the state's requirements for calibration gases.

If during a GCAF audit your station is found to have improper calibration gases, your station will be closed until new gases are obtained.

If you would like to receive an e-mail copy of GAS messages or be added to our quarterly e-newsletter, *RepairWatch* E-News, please send a request to [info@cleanairforce.com](mailto:info@cleanairforce.com).

~ GCAF recommends printing all GAS messages for your files and posting them in a prominent location for your employees to read. To retrieve or print a previous GAS message, go to the GAS message retrieval function in your analyzer and select the appropriate message to print (the analyzer holds up to 500 messages). ~
