

Georgia Analyzer System Message

Georgia's Clean Air Force (GCAF)

June 17, 2009

Message: 40529 Analyzers: 977

Testing Reminders

GCAF would like to remind all inspectors that when a vehicle is first presented for testing with the intent of tag renewal, inspectors must perform an initial paid test on this vehicle. A vehicle can only be turned away, or the test aborted, if it is unsafe to test.

Also, when testing a vehicle, please ensure that you are using the drop-down menu to select the appropriate vehicle information. Do not manually enter vehicle information unless the vehicle is not found in the drop-down menus. Verify that all vehicle information (year, make, model, engine size, etc.) is correct before proceeding with the inspection. Note that it is vital that you choose the correct engine size for the vehicle.

Entering incorrect vehicle information can affect the outcome of the inspection. If you enter any incorrect vehicle information, you **must** retest the vehicle using the correct information by selecting "TO CORRECT VEHICLE DESCRIPTION ERROR ON PREVIOUS TEST" from the Test Reason Menu. This retest will be free for the motorist; however, please note that you cannot use the motorist's free retest if the vehicle failed the initial test.

For more information, call GCAF Station Assistance at 800.449.2471 or e-mail info@cleanairforce.com.

If you would like to receive an e-mail copy of GAS messages or to be added to our quarterly e-newsletter, *RepairWatch* E-News, please send a request to info@cleanairforce.com.

~ GCAF requires that you print, read, and store all GAS messages in a binder on or near the analyzer. GCAF also recommends that you print a second copy of these messages and post them in a prominent location for your employees to read. To retrieve and print a previous GAS message, go to the GAS message retrieval function in your analyzer and select the appropriate message to print (the analyzer holds up to 500 messages). ~
