BLUE Waekon Adaptor

Waekon has updated their BLUE adaptor (#FPT25-7) with an adaptor containing a dimple or an "A" stamped in the bottom. Either adaptor is acceptable. The updated adaptor is for some of the newer model General Motors vehicles. All stations using Waekon adaptors will be required to have the newer BLUE Waekon adaptor (#FPT25-7) by August 1, 2009.

Please contact your equipment manufacturer (EM), local supplier or Waekon (800.367.9235) to order the adaptor. A list of local suppliers can be found in the New Station Application Packet located on the GCAF Web site at <http://www.cleanairforce.com/stations/openstation.php>.

Remember, stations using Waekon adaptors are required to have the latest adaptors by August 1, 2009. No action is needed if your station already has the updated adaptor(s). Other required updated Waekon adaptors include:

- ✦ RED (#FPT25-1; two dimples)
- ✦ BLACK (#FPT25-4; two dimples)
- ✦ ORANGE (#FPT25-6 ; one dimple or two "G"s)
- ✦ BROWN (#FPT25-8; one dimple or an "F")

If you would like to receive an e-mail copy of GAS messages or to be added to our quarterly e-newsletter, *RepairWatch* E-News, please send a request to info@cleanairforce.com.

~ GCAF requires that you print, read, and store all GAS messages in a binder on or near the analyzer. GCAF also recommends that you print a second copy of these messages and post them in a prominent location for your employees to read. To retrieve and print a previous GAS message, go to the GAS message retrieval function in your analyzer and select the appropriate message to print (the analyzer holds up to 500 messages). ~
