

CELEBRATE CLEAN AIR MONTH

WITH GEORGIA'S CLEAN AIR FORCE

10,000 POUNDS

Pedal Power

The average vehicle releases **10,000 pounds** of carbon dioxide annually, which contributes to global warming. Lessen your impact by walking, bike riding or carpooling to work once a week.

30 SECONDS

Don't Be an American Idle

Americans waste nearly four million gallons of gas annually by unnecessarily idling. If you will be idling for more than **30 seconds**, and it is safe to do so, turn your engine off.

8 GALLONS

Fuel in the Cool

The average car loses **eight gallons** of fuel each year to evaporation. Refuel your vehicle at night, when temperatures are cooler and gasoline evaporates less rapidly.

2014

Georgia's Clean Air Force, a partnership with the Georgia Environmental Protection Division, is encouraging motorists to take positive steps that help improve air quality in the state.

48 STATE PARKS

Plan a Staycation

Instead of planning a long road trip this month, plan to take a short trip to enjoy the natural beauty of one of Georgia's **48 state parks**. Experience hiking, biking, kayaking and more.

5,300 CARS

Make the "Right" Choice

Since 2004, Georgia-based UPS has saved 10 million gallons of gasoline – the equivalent to taking **5,300 passenger cars** off the road for an entire year – by instructing drivers to avoid left turns.

About Georgia's Clean Air Force

Georgia's Clean Air Force, a partnership with the Environmental Protection Division (EPD), is responsible for the management of the Enhanced Vehicle Emission Inspection and Maintenance (I/M) Program throughout Atlanta's 13 metro counties. Since 1996, the Georgia EPD has worked to reduce harmful vehicle emissions. Georgia's Inspection and Maintenance Program has prevented tons of ozone-forming pollutants from entering the air we breathe by identifying and repairing nearly two million heavy-polluting vehicles.
