

Subject: Station Update Reminder for 1995 and Older MYVs

Georgia's Clean Air Force reminds all stations to complete a [Station Information Update form](#) for certain station information changes. This is especially important if you stop testing 1995 and older model year vehicles (MYVs), which makes your station no longer an "All Vehicles Welcome" (ASM) testing station. Some changes also require a signage update.

What changes require completion of a Station Information Update form?

- Changes such as testing type (changing to a "1996 and Newer" only station), telephone number, zip code, management and station status, require you to submit an online Station Information Update form within five (5) days. The instructions and form are available online at <http://www.cleanairforce.com/station-information-update-instructions/>
 - Please note: if you choose to change to a "1996 or Newer Vehicles Welcome" station and discontinue testing 1995 and older MYVs, you will need to contact your equipment manufacturer (EM) to properly disable your dyne.
- If your inspection fee or hours of operation change, you are not required to complete a Station Information Update form.

What changes require a signage update?

- If your testing type, fee, or hours of operation have changed, your station signage must be updated immediately to avoid motorist confusion and complaints.

Failure to update your station testing type and/or signage may result in enforcement action

Many motorists rely on the GCAF website and call center to locate their testing location, which is why it is important that we offer the most up-to-date information for your station. Our program strives to make the testing experience a convenient and easy process for motorists.

If you have any questions, contact GCAF Station Assistance at 1.800.449.2471, option #2, via email at industry@cleanairforce.com, or via live chat, which is available at www.cleanairforce.com.

If you would like to receive an email copy of GAS messages or to be added to our quarterly e-newsletter, *RepairWatch* E-News, please send a request to info@cleanairforce.com.

~ GCAF and EPD require that you print, read, and store all GAS messages in a binder on or near the analyzer. GCAF and EPD also recommend that you print a second copy of these messages and post them in a prominent location for your employees to read. To retrieve and print a previous GAS message, go to the GAS message retrieval function in your analyzer and select the appropriate message to print (the analyzer holds up to 500 messages). ~
