

**Inspector Training Classes and Scheduling Suspended
Until Further Notice
March 18, 2020**

At Georgia's Clean Air Force, the health and safety of staff, inspectors and the public is top priority. We are diligently monitoring the Coronavirus (COVID-19) situation and closely watching official information from health authorities, such as the Center for Disease Control (CDC), as it relates to our larger community and station and inspection industry.

EPD and Georgia's Clean Air Force have made the following decisions:

- **All inspector training classes, including certifications, recertifications, and retests, have been suspended until further notice.**
- **We are not scheduling future inspector training classes at this time**, so there is no need to email the industry team with scheduling requests until further notice.
- For inspector recertifications, **administrative extensions will be applied to all inspectors that have submitted a timely application and/or have a class already scheduled.**
 - Inspectors need to submit an application prior to their license expiration; otherwise, GCAF will allow 60 days after the state of emergency has been lifted by Governor Kemp for expired inspectors to apply for the one-day recertification class.
 - If no application is received within the 60-day timeframe, inspectors will need to reapply through the full two-day course.

Please check the program website, www.cleanairforce.com, for important announcements, such as the pending restart date(s) of inspector training and the re-opening of scheduling requests, which is pending recommendations from state and federal agencies.

We are hopeful the situation improves, and we sincerely appreciate your patience and understanding as we navigate this unprecedented situation.

We will continue to update you with more information, once it becomes available.

If you have any questions, contact GCAF Station Assistance at 1.800.449.2471, option #2, via email at industry@cleanairforce.com, or via live chat, which is available at www.cleanairforce.com.

If you would like to receive an email copy of GAS messages or to be added to our quarterly e-newsletter, *RepairWatch* E-News, please send a request to info@cleanairforce.com.

~ GCAF and EPD require that you print, read, and store all GAS messages in a binder on or near the analyzer. GCAF and EPD also recommend that you print a second copy of these messages and post them in a prominent location for your employees to read. To retrieve and print a previous GAS message, go to the GAS message retrieval function in your analyzer and select the appropriate message to print (the analyzer holds up to 500 messages). ~
