

SIX TIPS to be Road Trip READY

Recent data collected by Kelley Blue Book found that 41% of Americans have summer travel plans, 64% are traveling 100+ miles from home and 65% plan to travel by vehicle.

Georgia's Clean Air Force (GCAF), in partnership with the Georgia Environmental Protection Division (EPD), encourages motorists to keep in mind six road trip tips to reduce vehicle emissions, boost their car's performance, decrease overall wear-and-tear and ensure a safe and enjoyable journey.

SCHEDULE A SERVICE.

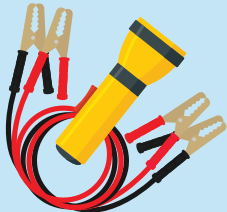

Schedule a service before your trip to check your oil, tire pressure, battery, air conditioning, brakes and engine.

DOWNLOAD BEFORE YOU DRIVE.

Download driving directions, podcasts and other road trip essentials before departing to ensure a smooth and safe ride.

PACK THE ESSENTIALS.

Don't forget to include car essentials like flashlight with extra batteries, a tire pressure gauge and jumper cables in your emergency kit.

WIPER WARNING.

Inspect your wipers to ensure they are not damaged and that they lie flat against the windshield. Use approved cleaning solutions to prevent glass damage and guarantee clear visibility.

INVEST IN A ROADSIDE ASSISTANCE MEMBERSHIP.

Investing in a roadside assistance membership guarantees coverage 24 hours a day, and most cover members whether they are the driver or a passenger.

SECURE SHADE.

Avoid parking in direct sunlight, use a UV-protectant wax and purchase a sunshade to protect against UV rays.
